V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-11	YES
	Claims		NO
Inventive step (IS)	Claims	1-11	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-11	YES
	Claims		NO

2. Citations and explanations

Reference is made to the following document:

D1: DE 41 19 402 A

Document D1 is considered the prior art closest to the subject matter of claim 1 and shows a sliding valve, from which the subject matter of claim 1 differs in that at least one elongated slot is provided in the sliding sleeve in the region of the control face.

The present invention can therefore be considered to address the problem of reducing the response times of the valve.

The solution to this problem as proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)) for the following reasons:

- reducing the mass of a movable element such as the sliding sleeve would undoubtedly result in the element having a quicker reaction time, but the form that the reduction might take is not indicated in the cited prior art. Generally

known and common solutions would also be available to a person skilled in the art, but these could not necessarily be readily implemented or applied.

Claims 2-11 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.

The claimed invention is industrially applicable.
